

## Second-Year Dental Students Give Presentation at Kinderfarm Preschool

On Friday, February 24, 2012, nine second-year dental students gave a pediatric dental presentation at Kinderfarm Preschool in Iowa City. Thirty preschoolers had an opportunity to learn what foods are good and bad for your teeth, see what a dentist wears and why, learn about tooth-brushing techniques, hear a story, and brush a puppet's teeth. The Pediatric Dental Club donated 30 toothbrushes and toothpaste to the students, and they were also given a weekly tooth-brushing calendar and a brochure for parents to read about dental health. Most of the students, when asked, reported having been to the dentist before, and all of the students were very enthusiastic about the presentation!

A special thanks goes to the volunteers who made this event possible: Jessica Grabouski (D2), Lauren Harvey (D2), Eric Barnes (D2), Doug Johnson (D2), Ernestine Dawa (D2), Staci Sieren (D2), David Gugliano (D2), Justine Stemper (graduate fellow, Preventive and Community), and Katie Anfinson (D2).
